

**Rogue Valley Genealogical Society
Board of Directors Meeting – February 2023
Technology & Data Management Report**

Subscription Websites Remote Access Update

As things have been static with our subscriptions, I will now only report any changes.

[Social Media & Video Update](#)

Computers

The back computer in the project office has died. I have ordered several new computers, so we have extra on hand when this happens. They are all refurbished computers from NewEgg. All have solid state drives (like a large thumb drive), so no moving parts. I have finally got patron station #4 up and running. With Jeff Bales' help, I have reinstalled Windows which took care of the problem.

Owl Cameras

The Owl cameras have been received. I have practiced with them a couple times. I'll be holding a training on Monday, February 24, for anyone interested in learning how to set them up and use them for meetings.

DeepFreeze

I am well aware that we need to get DeepFreeze up and running again. Unfortunately, the program controls were on the Projects Office computer that died. Once I get it replaced, I'll get Jeff in to help me restore the program. There may be a cost for updating the software.

Rogue Valley Tribune Calendar

Our new newspaper, the *RV Tribune*, has an online calendar of events. I tried it out by listing our book sale. There are other community calendars out there. This would be a great responsibility for a PR/Marketing Director...hint, hint...
